- 12 Kangerlussuaq (Greenland)
Disembarkation 15/08/2019 at 07h00

YOUR CRUISE

With the exceptional presence of **Patrick Baudry**.

This PONANT itinerary is your chance to embark on an 11-day expedition cruise to Greenland. Aboard *Le Boréal*, you will enjoy a combination of adventure and discovery in the company of an experienced team of naturalist guides, anthropologists, ornithologists and marine mammal specialists...

From Reykjavik, you will touch the east coast of Greenland at Nansen Harbor, the departure point of the first ever crossing of the ice sheet by the Norwegian Fridtjof Nansen. You will be able to disembark and walk along the first foothills of the ice sheet, a gigantic mass of frozen freshwater.

During your cruise and Zodiac® outings, you will have many opportunities to admire an abundant and varied fauna: seals, whales, orcas, not to mention the many species of seabirds.

Your ship will then sail down the narrow Prins Christian Sund passage, which connects the south-east of Greenland to the south-west. Jagged mountains, rocky cliffs, waterfalls and floating ice form a wonderful wild landscape in which frolic colonies of bearded seals.

To the country's west, you will sail amid the blue icebergs of the Narsaq region, and among the largest icebergs in the Northern Hemisphere in Disko Bay, before reaching the steep cliffs where nest the many birds in the fjord of Eternity.

Subject to ice and weather conditions. The expedition highlights and itineraries described above illustrate possible experiences only and cannot be guaranteed.
