YOUR CRUISE

PONANT invites you to experience something exceptional by discovering the Far North and the immense open spaces of the polar Arctic and its ice floes that extend to the North Pole.

You will board the ship at Longyearbyen in Norway for an 8-day expedition cruise to the heart of Spitsbergen, the largest island in the Svalbard archipelago.

Over these expedition at sea aboard your ship, in the company of our specialist teams, you will discover the exceptional flora and fauna that lives in these extreme conditions, where temperatures reach -30°C in winter.

This journey will take you on the trail of walrus, which can be admired near the 14th July Glacier, as well as the traces of the polar bear, the lord of the Arctic, which you will be able to admire in its natural environment.

Then you will sail to the Svalbard archipelago, and the last islands before the North Pole, where you will discover that unique feeling of having reached the top of the world. During this unforgettable expedition, our ship will sail to latitudes of 80° north.

We are privileged guests in these remote lands where we are at the mercy of weather, ice, tidal and current conditions. Landings on certain sites and the observation of certain wildlife cannot be guaranteed. They vary from day to day, making each PONANT cruise a unique experience. The Captain and the Expedition Leader will make every effort to ensure that your experience is as rich as possible, while complying with the safety rules and instructions imposed by the AECO.
